

I urge the FCC NOT to act on the NAB's petition seeking to stop XM Satellite Radio from broadcasting traffic and weather reports locally. There is no good reason for this to happen. If local stations have a problem with it, maybe there's something wrong with their programming. Just maybe they should take a close look at their own shops and correct any deficiencies there. Wouldn't prohibiting such broadcasts border on "restraint of trade" anyway? After all, I am paying for the service and by prohibiting it would I would be deprived, or "disenfranchised."
